During His Eminence’s Visit to Government Service and Engineering Effort Team’s Headquarters on World Day of Remembrance for Road Traffic Victims:

Sayyid Ammar Al-Hakeem, Head of the National State Powers' Alliance, visited the headquarters of the Government Service and Engineering Effort Team on the World Day of Remembrance for Road Traffic Victims. His Eminence praised the efforts being made and noted that Iraq has endured wars, hardships, terrorism, and sectarianism, which have diverted the state’s resources and institutions toward achieving stability and security.

H.E. addressed the challenges Iraq faces, including the lack of awareness among many youth about the complexities of the previous era, along with media narratives attempting to glorify the dictatorship era as a time of progress and services. H.E. stressed that certain media campaigns seek to frame democracy as the problem and dictatorship as the solution.

H.E. Sayyid Al-Hakeem said “delivering services is the current priority” affirming the importance of concentrating efforts on this area.

H.E. emphasized that integrating state institutions into a unified service team is a positive step forward. We pointed out that the delivery of services has fostered public satisfaction and urged service entities to reinforce the political system’s principles by meeting people’s needs. H.E. explained that services not only enhance national security but also transform lives, serving as a direct path to achieving Allah Almighty satisfaction.

H.E. called for sincere dedication to Allah in all efforts, encouraged service providers to excel creatively, and stressed the importance of professionalism and humility in interacting with the public. H.E. also highlighted the need to focus on priorities, promote services effectively, inspire optimism, and prevent the political misuse of services. Additionally, we advocated for diversifying project resources, pooling capabilities, and engaging affluent individuals in supporting the team’s initiatives.
